

JOIN OUR **ONLINE** STUDY ON LANGUAGE INTERVENTIONS IN AUTISM

AIMS

To examine the efficacy of online music-assisted language interventions in 24-60-month-old nonverbal or minimally verbal autistic children.

WHO

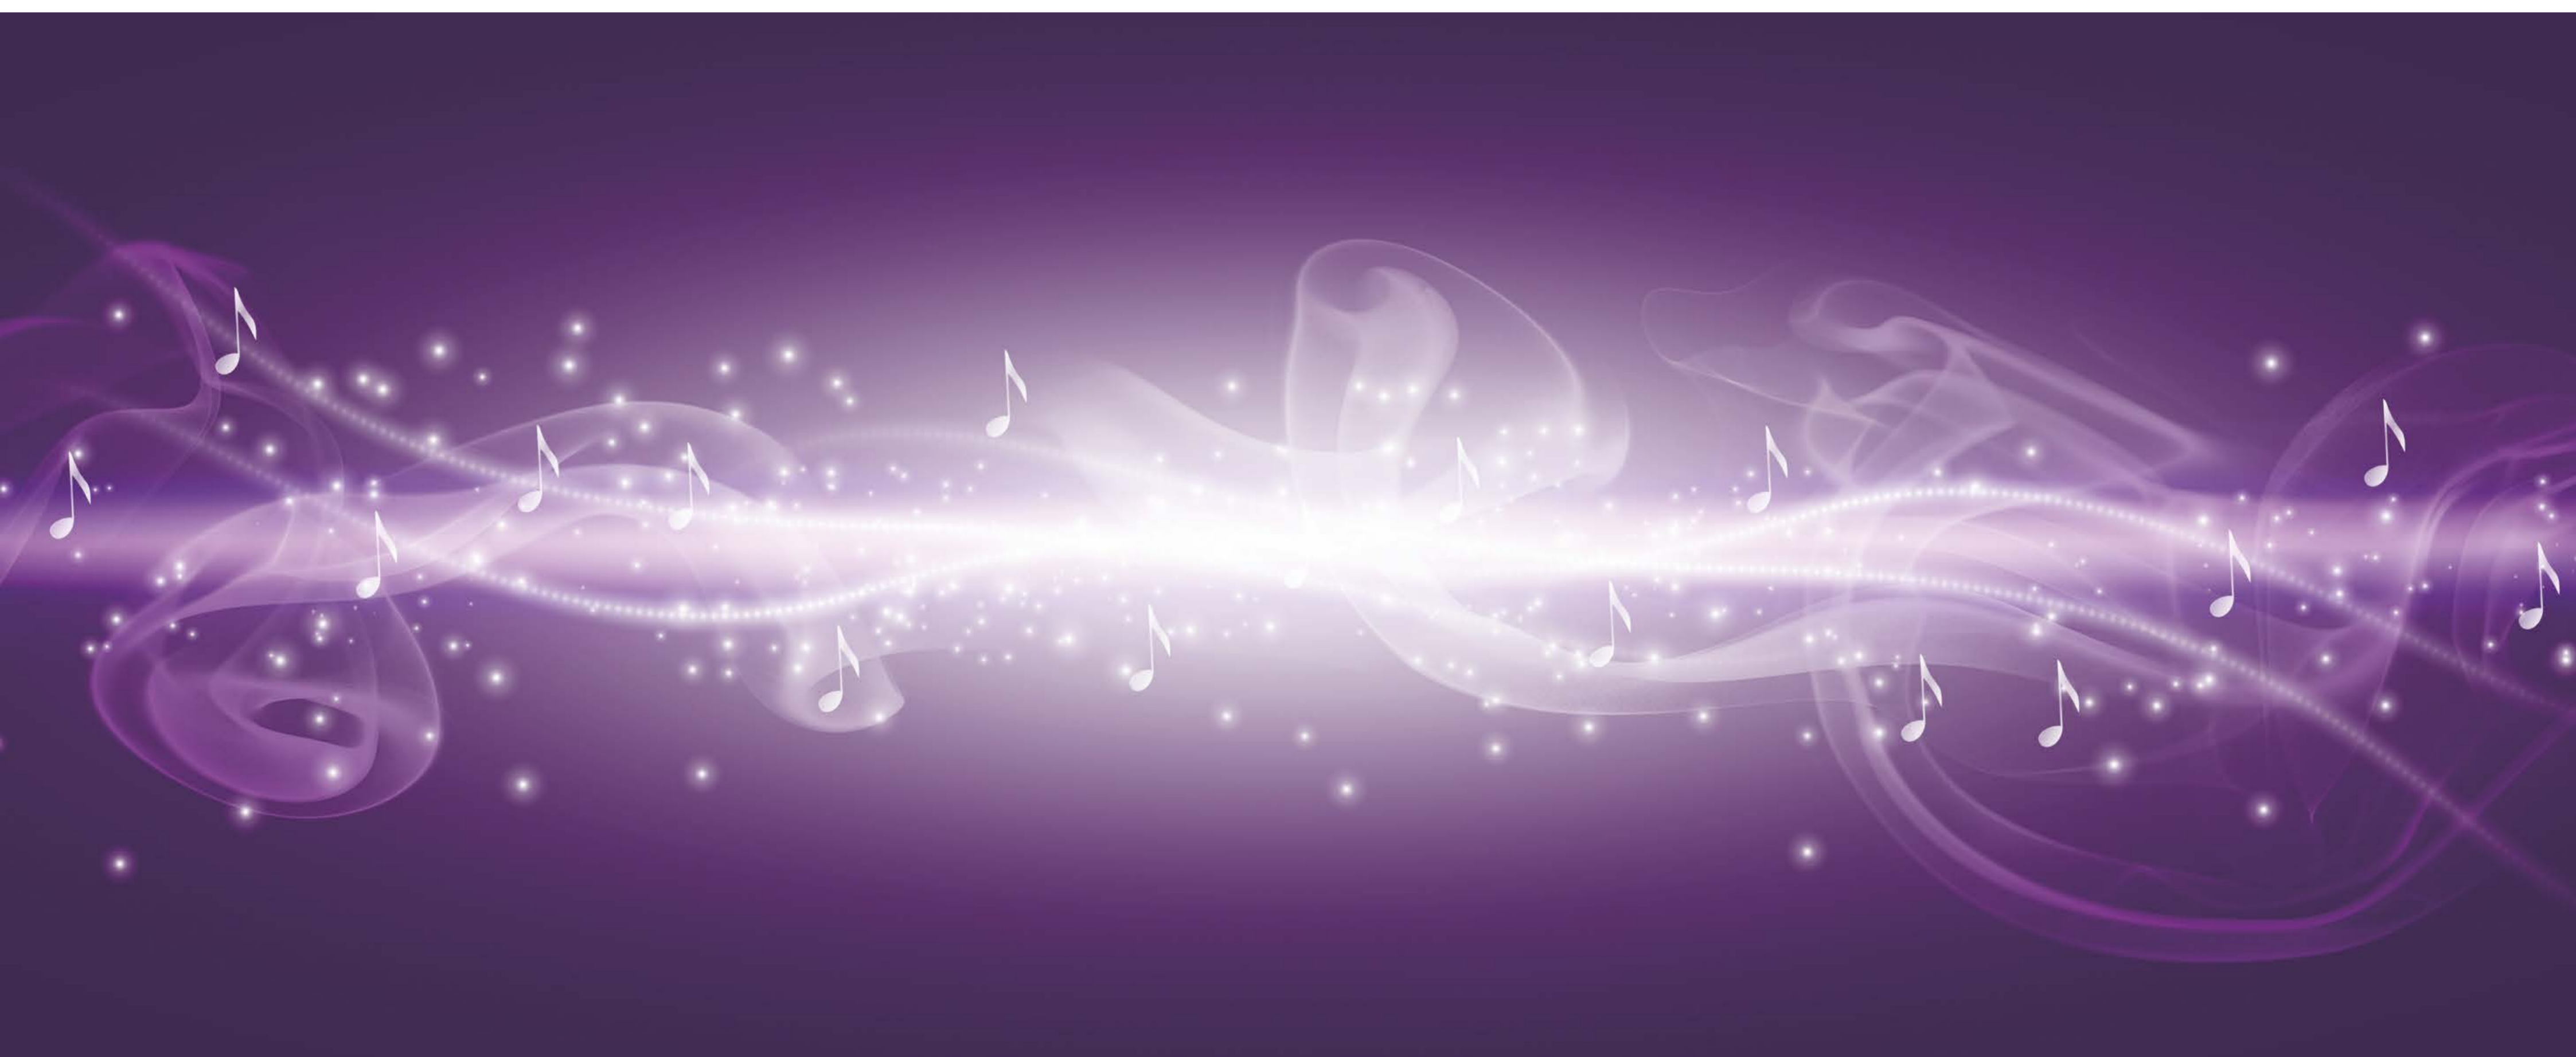

This study is looking for:

- **Autistic children – with an official diagnosis**
- **Aged 24-60 months, nonverbal or minimally verbal (fewer than 20 spontaneously spoken words)**

PROCEDURE

We will offer **parents online training in delivering** language interventions to their children using either music-assisted programmes or speech and language therapy. Participation will involve two online 45-min training sessions per week, for 18 weeks.

This study has been reviewed by the University Research Ethics Committee at the University of Reading and the NHS/HSC Research Ethics Committee, and has been given a favourable ethical opinion for conduct.

This study is funded by an ERC Proof of Concept Grant to Dr Fang Liu, f.liu@reading.ac.uk, University of Reading.
